

SHALIMAR MEHRA

WEB DEVELOPER

+91 9560362339 | shalimarmehra892@gmail.com | www.shalimarmehra.in | New Delhi, India

SUMMARY

Dynamic professional with extensive experience in developing and launching innovative projects and deep understanding of the startup landscape. Skilled at cultivating relationships with potential stakeholders, leading teams, and driving growth. Exceptional track record in leveraging technology to create and execute strategies for long-term success.

PROFESSIONAL EXPERIENCE

Founder & Lead Developer - Dev Dossier

July 2024 - Present

Founded and operate Dev Dossier, a successful web development business delivering comprehensive services including web design, development, and maintenance. Lead a team of skilled developers and designers, ensuring the delivery of high-quality web solutions for clients across various industries. Implement best practices in project management, client communication, and technical development, driving customer satisfaction and business growth.

Freelance Web Developer

July 2023 - May 2024

Designed and developed custom websites for diverse clients, utilizing both WordPress and custom coding (HTML, CSS, JavaScript). Provided continuous maintenance and updates, ensuring optimal performance and security of client websites. Collaborated closely with clients to understand their needs and deliver tailored web solutions that enhanced their online presence.

PROJECTS

Business Website - Using Next JS and Tailwind CSS Framework

August 2024 - Present

Designed and developed custom websites for diverse clients, utilizing both WordPress and custom coding (HTML, CSS, JavaScript). Provided continuous maintenance and updates, ensuring optimal performance and security of client websites. Collaborated closely with clients to understand their needs and deliver tailored web solutions that enhanced their online presence.

Logistic Website - Using CMS with WordPress and Elementor Page Builder

May 2024 - June 2024

A modern logistics website built using WordPress CMS and enhanced with the powerful Elementor page builder plugin. This dynamic platform offers seamless management of logistics content and services through WordPress's intuitive backend system. The Elementor page builder integration enables drag-and-drop customization of layouts, making it easy to create and update professional-looking pages without coding knowledge. Features include responsive design, service showcases, and contact forms. The combination of WordPress CMS and Elementor provides flexibility in content management while maintaining a visually appealing and user-friendly interface optimized for logistics business needs.
